

I Claim:

- 5 1. In combination, a pair of eyeglasses and a light source, comprised of:
- eyeglasses having a front frame portion and arms extending therefrom;
- a light source positioned on the arms.
- 10 2. The combination of claim 1 wherein the light source is positioned at an end of the arm.
- 15 3. The combination of claim 1 wherein the light source is positioned at a distal end of the arm.
4. The combination of claim 1 wherein the light source is positioned at a proximal end of the arm.
- 20 5. The combination of claim 1 wherein the light source is positioned between a proximal end and a distal end of the arm.
6. The combination of claim 1 wherein the light source is positioned in an end of the arm.
- 25 7. The combination of claim 1 wherein the light source is positioned in a recess of the arm.
8. The combination of claim 1 wherein the light source is positioned in a cavity
- 30 within the arm.

9. The combination of claim 1 wherein the light source is positioned to shine towards the distal end of the arm.

10. The combination of claim 1 wherein the light source is positioned to shine towards the proximal end of the arm.

11. In combination, a pair of eyeglasses and a writing instrument, comprised of:
eyeglasses having a front frame portion and arms extending therefrom;
a writing instrument stored on one of the arms.

12. The combination of claim 11 wherein one of the arms is provided with an opening into a cavity in the arm, the cavity being shaped to receive a writing instrument, wherein the writing instrument is stored.

13. The combination of claim 11 wherein the opening is provided at the distal end of the arm.

14. The combination of claim 12 wherein the opening is provided at the distal end of the arm.

15. The combination of claim 12 wherein a side of the arm is provided with a groove that opens into the cavity, wherein the writing instrument is further comprised of a neck attached at a first neck end to the writing instrument and at a second neck end to a bead, wherein the neck is dimensioned to reside within the groove when the writing instrument is positioned within the groove, and the bead is situated outside of the groove.

16. The combination of claim 10 wherein one of the arms is provided with a container on one of its sides for storing the writing instrument.

17. The combination of claim 16 wherein the container is provided with an opening that faces towards a distal end.

18. The combination of claim 17 wherein the container is provided with an opening that faces towards a proximal end.

19. In combination, a pair of eyeglasses and a screw driver, comprised of: eyeglasses having a front frame portion and arms extending therefrom; a screw driver stored on one of the arms.

20. The combination of claim 19 wherein one of the arms is provided with an opening into a cavity in the arm, the cavity being shaped to receive a screw driver, wherein the screw driver is stored.

21. The combination of claim 20 wherein the screw driver is attached to a plug end.

22. The combination of claim 19 wherein the screw driver extends from the distal end of the arm.

23. The combination of claim 22 wherein the plug end covers the screw driver.

24. The combination of claim 19 wherein a side of the arm is provided with a groove that opens into the cavity, wherein the screwdriver is further comprised of a neck attached at a first neck end to the screwdriver and at a second neck end to a bead, wherein the neck is dimensioned to reside within the groove when the screwdriver is positioned within the groove, and the bead is situated outside of the groove.

25. The combination of claim 19 wherein one of the arms is provided with a container on one of its sides for storing the screwdriver.

26. The combination of claim 25 wherein the container is provided with an opening that faces towards a distal end.

27. The combination of claim 25 wherein the container is provided with an opening that faces towards a proximal end.

28. The combination of claim 1 wherein at least one of the arms is reversible.
29. The combination of claim 11 wherein at least one of the arms is reversible.
- 5 30. The combination of claim 19 wherein at least one of the arms is reversible.
